ABSTRACT

Volume 2, the second of eight publications developed by the Intercultural Development Research Association (IDRA) as part of the "Texas School Dropout Survey Project," focuses on the issue of the computation of a dropout rate. Three important factors which influence the mathematical computation of a dropout rate are identified: time frame, range of grade levels, and student accounting procedures. Each of these is discussed briefly and its impact on the dropout rate is examined. A technique for estimating a cohort dropout rate through longitudinal attrition calculations developed by IDRA to calculate a standardized dropout rate for the state of Texas and the school districts within Texas is described, and the formula and results generated by the use of the formula are presented. Descriptions of district-level, county-level, education service center region, Job Training Partnership Act service delivery area, and statewide analyses are illustrated with 72 data tables. Enrollment and attrition data by district and by county are appended. (NB)

Preface

This volume is one of eight publications developed by the Intercultural Development Research Association as part of the Texas School Dropout Survey Project. Seven volumes contain comprehensive reports for each area of study:

Volume 1: Magnitude of the Problem -- Census Analysis

Volume 2: Magnitude of the Problem -- Attrition Analysis

Volume 3: Magnitude of the Problem -- Tracking Study

Volume 4: Magnitude of the Problem -- School District Research and Procedure

Volume 5: Benefit-Cost Impact of the Dropout Problem

Volume 6: Program Responses -- Their Nature and Effectiveness

Volume 7: Study Methods and Procedures

Additionally, a synopsis of findings and implications across all areas of study is included in the report entitled Texas School Dropout Survey Project: A Summary of Findings.

EXECUTIVE SUMMARY

This report presents the results of the dropout studies conducted by Intercultural Development Research Association (IDRA) under contract with the Texas Department of Community Affairs (TDCA) in collaboration with the Texas Education Agency (TEA). The major research tasks were designed to examine three primary questions:

(1) What is the magnitude of the dropout problem in the State of Texas?

(2) What is the economic impact of the dropout problem for the State?

(3) What is the nature and effectiveness of in-school and alternative out-of-school programs for dropouts in the State?

The research was conducted during the period of May to October, 1986. Given the paucity of reliable data on dropouts, research methods included primary analyses of data collected by IDRA and secondary analyses of available databases including Fall Survey and Annual Performance Report information collected by TEA and census data collected by the U. S. Bureau of the Census. Major findings are listed below.

MAJOR FINDINGS

Magnitude of the Problem

1. The 1985-1986 attrition rate for Texas high schools was 33 percent.

2. One in five Texas young people (nearly half a million) age 16 to 24 were not enrolled in school and had not completed the twelfth grade in 1980.

3. Three out of ten Texas dropouts -- 152,000 young people--had completed fewer than nine years of schooling when they left school.

4. Approximately 85 percent of Texas dropouts were born in the United States; less than 15 percent were born in a foreign country.

5. Of the nearly half a million Texas dropouts age 16 to 24, somewhat more than half (52 percent) were male.

6. Among females, attrition rates ranged from a low of 26 percent for White females to 43 percent for Hispanic females.

7. Attrition rates differed markedly for the three major racial/ethnic groups in the State: 27 percent for Whites, 34 percent for Blacks and 45 percent for Hispanics.

8. Hispanic youth, age 16 to 19, were twice as likely, and youth, age 20 to 24, nearly three times as likely to have left school prior to the completion of the twelfth grade as their White counterparts.

9. Nearly half of Hispanic dropouts had completed less than ninth grade when they discontinued schooling compared to 18 percent of White and Black dropouts who discontinued schooling before the ninth grade.

10. Black male dropouts were less likely to be employed than either Hispanic or White male dropouts; two in five Black male dropouts, age 16 to 19, in contrast to one in five of Whites and 26 percent of Hispanics in that age group, were not in the labor force.

Dropout Accounting Procedures

11. Thirty-nine percent of Texas school districts have a system for identifying dropouts.

12. The majority of districts follow similar but not identical forms of the TEA dropout definition.

13. Sixty-two percent of districts do not use a dropout formula for calculating their dropout rate; among districts who have a formula, 9 percent use Average Daily Attendance while 24 percent use Average Daily Membership as the base figure.

14. Only 3.5 percent of districts have conducted some form of dropout research with only nine districts conducting formal research studies on dropouts.

BEST COPY AVAILABLE

Statewide Tracking Survey

15. Sixteen percent of the students tracked who were presumed dropouts had not dropped out of school.

16. Twenty-eight percent of the students tracked were employed; of these, most worked at labor intensive, minimum wage jobs.

17. The majority of the students tracked left school because of poor grades, marriage/pregnancy, or financial problems.

Available Dropout Programs

18. Approximately 12 percent of Texas school districts reported having a dropout program; the number of programs reported by colleges, service delivery areas and other agencies was not commensurate with the magnitude of the problem.

19. Approximately 89 percent of dropout programs in Texas reported having no evaluation data.

Economic Impact

20. The dropout problem is costing the State $17.12 billion in (a) foregone income and lost tax revenues, and (b) increased costs in welfare, crime and incarceration, unemployment insurance and placement, and adult training and education (for each cohort of dropouts). Every dollar invested in educating potential dropouts is estimated to result in a return of nine dollars.

IMPLICATIONS OF THE RESEARCH

1. There is a need to develop and use a standardized dropout definition with explicit identification procedures.

Findings from the district dropout identification and procedures surveys, the dropout research reviews, and the student tracking surveys point to a need for a standardized, uniformly-applied dropout definition with necessary identification procedures. Only 39 percent of districts reported having a system for identifying dropouts. Among these districts, definitions were similar but not uniform. The lack of standard definitions effectively precludes aggregating individual district data across school systems and, in some cases, even prevents aggregating data across campuses within a particular school system.

Any definition and identification procedure at the State level must accommodate contextual variables at the district level and also be rigorous enough to result in reliable aggregation across districts. In addition, the definition must be sensitive to such issues as summer versus school-term withdrawals, non-attenders often carried on membership rolls, verifiable transfer procedures and completion of graduation requirements.

State efforts at standardizing dropout identification procedures were initiated in the TEA 1985 Annual Performance Report requirements. Dropout reporting requirements for 1986 focus on a districtwide base figure for grades 7-12. Student identification and tracking procedures are also being put in place with the Public Education Information Management System (PEIMS) being developed by TEA. Both of these efforts can serve as a springboard for further standardization.

2. There is a need to develop standard procedures for calculating the dropout rate.

- As a corollary to the development of a standard dropout definition, calculation procedures must be standardized and clearly specified. IDRA research findings indicate that 62 percent of districts do not use a formula for calculating the dropout rate, despite current reporting requirements developed for local use.

Critical manipulable factors involved in the calculation of dropout rates include: (a) the time frame during which the number of students is counted, e.g, annual versus longitudinal, (b) the range of grade levels included in the dropout rate calculation i.e., the greater the grade span, the lower the dropout rate, and (c) the student accounting procedures used by the district, e.g. average daily attendance versus average daily membership.

While calculations of district dropout rates must remain useful at the local level, State level rates must be used to guide policy deliberations and monitor the effects of State and local intervention strategies.

BEST COPY AVAILABLE

3. There is a need to develop a centralized and standardized system for collection of dropout data.

The extensive variability in district dropout definitions and calculations noted above makes comparability across districts difficult at best. Even with standardization, however, it will become important to develop and maintain a centralized means of aggregating and analyzing dropout data across districts. With a centralized data base, the overall effect of intervention strategies as well as the effect of these efforts on particular populations can be monitored.

4. There is a need to develop tracking mechanisms which will increase the reliability of dropout counts and will result in more appropriate program interventions.

Research findings clearly indicate that current communication between and within districts does not facilitate tracking of students who withdraw from a particular school. Approximately 16 percent of the presumed dropouts tracked across the State by telephone or mail reported having never dropped out of school but either transferred or were still enrolled. Within districts, procedures for tracking of students are varied and depend, in part, on district size and resources. Across districts, standard recordkeeping and transfer documentation and follow-up procedures for student withdrawals would greatly facilitate tracking of students as they move from one district to another.

The Migrant Student Record and Transfer System (MSRTS) is the only national longstanding system for tracking of students. The centralization of achievement and other data at a single location currently required by the MSRTS might be circumvented through the use of a computer bulletin board concept with subsequent transfer of records remaining at the district to district level. Whatever the configuration of a feasible tracking system, it is imperative that tracking mechanisms be identified which will enhance monitoring of progress in addressing the dropout problem.

5. There is a need for early dropout intervention efforts given the large numbers of students who leave before the ninth grade.

IDRA research evidence reveals that three out of ten Texas dropouts had completed fewer than nine years of schooling. Among Hispanic dropouts, almost half had discontinued schooling before completing the ninth grade. Reviews of existing dropout prevention programs in Texas revealed that few focus on pre- high school students. If dropout prevention efforts are to effectively impact at-risk populations, prevention efforts must begin at earlier levels. In doing so, strategies must be program-focused and avoid merely labeling and stigmatizing students at earlier grades.

6. There is a need for developing and replicating model dropout prevention and recovery programs for particular types of high risk groups

Reviews of available literature and IDRA findings related to existing State programs indicated that information on "what works" is generally fragmented. While some exemplary or model programs are in operation across the country and in the State, there is little systematic and generalizable information which would permit program replication. It is, therefore, important to develop and replicate prototypic programs which have the components which are known to be successful: teaching of basic skills, survival skills training, work/study programs, individualized instruction, strengthened guidance and counseling, highly committed and caring teachers with high expectations for their students, and community/parent/business liaisons.

7. There is a need to expand the pool of available dropout prevention and recovery programs in order to service the large and diverse dropout population in the State.

Research on existing dropout programs in Texas revealed that the number currently in operation is inadequate when contrasted with the magnitude of the dropout problem in the State. There is a dearth of formal, structured programs specifically targeted at dropout or dropout-prone youth both within and outside the State's public school systems. In addition to developing and replicating model programs, successful models and strategies must be incorporated into a substantially larger number of diverse programs which will service diverse needs within the dropout population.

In order to serve the diverse migrant

BEST COPY AVAILABLE

population, for example, a Graduation Enhancement Model is being developed by TEA and the Texas Migrant Interstate Program. According to data compiled by the Coordinator of the Program, migrant dropout rates are estimated to be in the 60 to 90 percent range. It is obvious, then, that more and varied programs are needed.

8. There is a need to develop systematic approaches to the evaluation of dropout prevention and recovery efforts.

The survey of dropout prevention and recovery programs indicated that 89 percent had no evaluation data . In the absence of such data, conclusions about program effectiveness are not possible. In developing guidelines and standards for evaluation, it is important to ensure that evaluation designs serve to identify programs that work for particular types of participants in particular types of situations. Strategies and results in a prevention program may differ from strategies and results in a recovery effort. Success in a prevention program for non-migrant students may differ from that for migrant students. The enormity of the dropout problem leads to the inevitable conclusion that all students do not leave school for the same or similar reasons or under the same or similar conditions. Neither the reasons nor the solutions can be the same. Evaluation designs must be able to generate information about what works, for what target group, and under what conditions.

9. There is a need to develop and link public and private sector initiatives which are proportionate to the massive number of dropouts in the State.

There are on-going substantive efforts directed at the dropout issue in the State of Texas. State agencies, including TEA and TDCA, have already begun initiatives designed to address the problem from both a prevention and recovery perspective. Private corporations, including Coca-Cola USA and Southwestern Bell, are sponsoring efforts designed to raise awareness of the issues and to develop program alternatives. Foundation support is also being directed at the dropout problem. The Ford Foundation, for example, has established a national dropout initiative which involves public and private sector collaboratives. Further development of communications networks and other linkages between private and public sector initiatives is central to effective dropout interventions. Coordination is also crucial to maximizing the return on the investment which must be made.

The linkages and networking which are necessary to producing results in the area of school dropouts will be facilitated by working within the concept of the educational pipeline. A focus on the student, as he or she progresses through the pipeline, i.e., kindergarten through public schooling and on to a college education, provides context and continuity. The Dallas County Community College District, for example, has established Adopt-A-School partnerships with area middle schools. College faculty are given release time in order to provide staff development and technical assistance to schools.

10. There is a need to make an investment in dropout prevention and recovery efforts which is commensurate with the magnitude of the problem and its economic impact in the State of Texas.

The number of dropouts for the graduating class of 1985-1986 was estimated to be 86,000. This represents a 33 percent attrition rate for a single group of high school students over a three year period. Over the course of their lifetime, projected losses in tax revenue averaged $58,930 per dropout. The estimated cost of keeping each of these students in school was $3,859 per averted dropout. In addition, the State would have realized a savings of $652 million in social expenditures related to crime, welfare, incarceration and unemployment costs. Every dollar invested in educating potential dropouts will result in a return of nine dollars. An investment in human capital yields substantial short and long term results.

INTRODUCTION

The magnitude of the school dropout problem continues to cause concerns among educators and policy makers at the national, state, and local levels. Nearly all school districts are monitoring the enrollment and graduation or dropping out of their students. Numerous research studies have focussed on various aspects of the dropout phenomenon -- the definition of dropout, the reasons for dropping out, the procedures for collecting the necessary information to determine dropout statistics, the method used to compute the dropout rate, the consequences and costs of dropping out, etc. Despite the efforts of school districts, other educators and policy makers and despite the number of research studies regarding the various aspects of the dropout phenomenon, there appears to be little agreement on the directions for school dropout programming (Morrow, 1986). Non-uniformity in defining the target population (dropouts), in computing a summary statistic (dropout rate) and in collecting and coding primary data has led to incompatible and inconsistent results (Morrow, 1986). The development of a common knowledge base regarding dropouts has been impeded by a non-standard definition for dropouts and differences in the computation of a dropout rate (Morrow, 1986).

This portion of the study on the magnitude of the dropout problem will address the issue of the computation of a dropout rate. Other aspects of the dropout phenomenon will be addressed in another related report.

A dropout rate is expressed as a fraction or ratio and is often written as n/d = rate. The numerator (n) is the number of special cases from the total number of possible cases, the denominator (d). In computing the dropout rate, the numerator is the number of students defined as dropouts divided by the pool of students from which the dropouts originated, the denominator.

There are three important factors which influence the mathematical computation of a dropout rate: (1) time frame, (2) range of grade levels, and (3) student accounting procedures. The first factor which influences the mathematical computation of a dropout rate is the time frame during which the number of students who drop out is coutned. There are two time frames used to compute dropout rates -- the annual dropout rate and the cohort dropout rate. The annual dropout rate, which is the msot common of the two, uses a single school year as its time frame. The number of dropouts (the numerator), usually the total of the district's dropouts across all grade levels, is divided representing a single year for either a single grade level or multiple grade levels.

The cohort dropout rate has a time frame of several years with more involved statistical calculations on only a segment of the school's population. This method is used to track the dropping out of students who are expected to graduate together. The cohort dropout rate presents a more accurate picture of the district's dropout rate or holding power (Morrow, 1986).

The second factor which influences the mathematical computations of a dropout rate is the grade level distribution of the baseline population. Grade level refers to the range of grades most likely to generate dropouts. The inclusion of all grade levels (K - 12) tends to reduce the dropout rate while limiting the grade levels (i.e. 7 - 12 and 9 - 12) tends to increase the dropout rate. Research has indicated that most dropouts occur between grades 7 - 12 with the vast majority taking place between grades 9 - 12.

The student accounting process is the third factor which may influence the computation of a dropout rate. Student accounting refers to the approach used to tally the number of students enrolled in a district. This is traditionally done by two related but different methods--Average Daily Attendance (ADA) or Average Daily Membership (ADM). ADM inlcudes all students who attend school on a daily basis. Using ADM as the denominator produces a lower dropout rate than using ADA as the denominator.

As a review of the above information shows, the computation of a dropout rate and the rates generated are influenced by many variables. In order to calculate a standardized dropout rate for the State of Texas and the school districts within it, the Intercultural Development Research Association (IDRA) has developed a technique for estimating a cohort dropout rate through longitudinal attrition calculations. This report presents the formula and the results generated by the use of this formula.

Methodology

Longitudinal dropout estimates can be estimated through attrition analysis. IDRA has developed a formula for computing attrition rates which also allows for increases and decreases in a district's enrollment figures. The technique developed and used by IDRA consists of taking grade level enrollment for a base year and comparing these figures to enrollment in subsequent years, with the assumption that a decline in the number of students enrolled constitutes the attrition rate for the school or district, and with the further assumption that this cohort rate is closely related to the annual dropout rate.

Since school and district enrollments are not constant, with changes in size due to increasing or declining enrollments, it is necessary to take the growth trend into account in computing the attrition rate. This was done by determining this size change ratio by dividing the total district enrollment for the longitudinal study end year by the total district enrollment for the base study year. Multiplying the base year enrollment by the district change ratio produces an estimate of the number of students expected to be enrolled at the end year. Mathematically, the formula adjusting for population changes is presented in figure 1 and is described below. If a district at the end of 1983 had 1,000 students in its high school with 300 of these in the ninth grade, and four years later the high school population had increased to 1,200, the number of twelfth graders expected would be the original 300 plus an increase in high school would have an expected twelfth grade class of 360. The same is true in the case of an enrollment by the base year enrollment will reduce the expected number of students in the end year by the percentage of enrollment decline which the district has experienced during the years of the longitudinal study.

The IDRA attrition model takes two additional assumption. The first is that the number of students transferring in and out

Figure 1

IDRA's Attrition Formula

$$\text{District Attrition Rate} = (S^1 *(D^2/D^1))-(S^2)/(S^1 *(D^2/D^1)) = E$$

$$E-S^2 = A^1$$

$$A^1/E*100 = A^2$$

Whereas: S^1 = district's 9th grade enrollment in the base year.

S^2 = district's 12th grade enrollment in the end year.

D^1 = district's total high school enrollment in the base year.

D^2 = district's total high school enrollment in the end year.

E = expected enrollment

A^1 = attrition number

A^2 = attrition rate (percentage)

of the school district is fairly evenly divided among the various grades included in the longitudinal time span. The second assumption is that the number of students retained at each grade level is fairly constant from one year to the next. Variations in the number of retentions among the various grades included in the longitudinal study have a negligible effect as long as there is no marked increase or decrease in the number of students retained at the grade level during the span of the longitudinal study.

In order to implement its formula and in order to narrow the possibility of error in determining attrition rates for the State of Texas and for individual school districts, IDRA limited its longitudinal study to four grade levels over a four year period. The ninth grade in 1982-83 was used as the base year and the twelfth grade in 1985-86 was used as the end year. Using Fall Suvey membership data supplied by the Texas Education Agency, the study looked at a cohort of students in order to produce an attrition rate. Special districts (military and special education) were not included in the study because they enrolled children of military personnel, have unstable enrollment, and do not have a tax base in support of the school program. The data base contained data for 967 of 1,093 school districts from 252 of 254 counties who operated high schools during both the base year and the end year. Attrition rates derived in the study should be interpreted as very conservative estimates of the extent of school dropouts. There is evidence in the literature and support in our study of census data that students drop out of school as early as the elementary school grades and that the number of dropouts in middle school, particularly in the transition from junior high to high school, is rather large. Students who dropped out before reaching the ninth grade are not included in the attrition esitmates. Also, students who may have dropped out during their senior year are not included in the count.

Though this methodology may be more than adequate for estimating the longitudinal dropout rate for the entire State and most of the school districts, caution should be used in the utilization of attrition rates as dropout rates. As stated earlier, the attrition rates as dropout rates. As stated earlier, the attrition rate and the dropout rate are not synonymous. In addition, several problems manifested themselves in the analysis and treatment of data. Sources of data (data tapes) contained errors which are probably attributed to data entry or data extraction from other sources. Reporting formats have changed in the last few years which create problems in conducting longitudinal studies. Data bases may be acquired in different formats; the number of students enrolled and the average daily membership may be closely related, but they are not the same. There have been changes in school district organization, including the consolidation of school districts, and the initiation or discontinuation of certain grade levels in specific districts.

Changes in enrollments in some districts may reflect a large attrition rate attributed to the court ordered desegregation of certain grade levels. The termination of court ordered desegragation at specific grade levels produce an influx of students at that level which produced strange attrition figurs for certain ethnic groups.

Very small school districts proved difficult in conducting longitudinal studies. The entrance or exiting of small number of students tended to produce exaggerated results in the determination of attrition rates.

Other variables may also affect attrition rates as developed and presented here. For example, there may be large number of students enrolled in border area schools who come to Texas schools from northern Mexico to learn the English Language rather than to complete an education. These students may enroll and attend schools in Texas for one or two years and discontinue attendance when the language development goal has been met, but are not really dropouts in that schooling may have been completed or will be completed in Mexico.

In order to generate attrition rates for each district and the State of Texas as a whole, Fall Membership Survey data was collected from the Texas Education Agency (TEA) for the base year of 1982-83 and for the end year of 1985-86. A computer was used to calculate attrition rates using the formula developed by IDRA and the data base obtained from TEA. Calculated attrition rates were rounded to the nearest whole percent.

Enrollment and attrition data reported in this volume are based on five different levels of analyses. These included:

(1) district-level analysis;
(2) county-level analysis;
(3) education service center (ESC) region analysis;
(4) Job Training Program Act (JTPA) service delivery area (SDA) analysis; and
(5) statewide analysis.

The larger the unit of analysis, the more precise the results generated by the formula. That is, attrition estimates at the regional and State levels are very reliable. Estimates at the individual district level may be less accurate due in part to the influence of changes in very small numbers. Attrition rates for some individual districts, particularly those with less than 100 students, were not calculated when the error of measurement appeared inappropriate. Where an attrition rate was not calculated for a district, two asterisks (**) were assigned.

For the expected 12th Grade enrollment during the end year and the attrition number, comparison of summary table figures may differ slightly due to rounding. This difference had no affect on the calculated attrition estimate.

In spite of the limitations of the longitudinal attrition estimates, it is felt that this technique provided the most valid and accurate measurement of the dropout rate in the various school districts and in the State as a whole. However, there is no reason for relying on any one technique over another. The use of school district reports, student surveys, census data, earlier studies and attrition estimates can produce the parameters of the school dropout problem. Please refer to other volumes of this study for a complete picture of the dropout phenomenon.

DISTRICT LEVEL ANALYSIS

An analysis of enrollment data and attrition rates at the district level are presented in this section of the report. The 967 school districts having Fall Membership data in both the base year and end year were stratified by size. Each district was assigned to one of seven strata according to high school enrollment (9th - 12th grade) during the base year. The strata of district sizes included:

(1) less than 100 students;
(2) 100 - 499 students;
(3) 500 - 999 students;
(4) 1,000 - 2,499 students;
(5) 2,500 - 4,999 students;
(6) 5,000 - 9,999 studetns; and
(7) 10,000 students and over.

As previously mentioned, IDRA's attrition estimates are most reliable at the regional and State levels of analysis. Estimates at the individual district level may be less accurate. The larger the unit of analysis, the more precise the results. As you will note, an attrition rate was not calculated for some districts; asterisks will appear for these districts.

Within this section, enrollment and attrition data are presented without regards for race-ethnicity and sex. Please see Appendix A for complete enrollment and attrition data by district (grouped by alphabetically by county).

Less Than 100 Students

Table 1 presents enrollment data and attrition rates for districts having a total high school enrollment of less than 100 students. Of the State's 967 school districts operating public high schools during both the base year (1982 - 83) and the end

---

[a] Enrollment data is from the Fall Membership Survey and was obtained from the Texas Education Agency.

[b] Based on IDRA's attrition formula.

year (1985 - 86) of this longitudinal cohort study, 225 had student populations of less than 100 students.

As a review of the attrition data in Table 1 shows, attrition rates ranged from a low of zero percent for Austwell-Tivoli ISD to a high of 69 percent for Highland Park ISD (Amarillo). A total of 105 districts have attrition rates of less than 30 percent while 83 districts had attrition rates of 30 percent or more; attrition rates were not calculated for 37 districts.

100 - 499 Students

Table 2 presents enrollment data and attrition rates for districts having a total high school enrollmetn of from 100 to 499 students. Four hundred and sixty-seven (467) of the State's districts fell within this strata.

As a review of Table 2 shows, attrition rates ranged from a low of zero percent for Columbus ISD to a high of 67 percent for Center Point ISD. About 250 districts had attrition rates of less than 30 percent while 200 districts had attrition rates of 30 percent or more; attrition rates were not calculated for 17 school districts.

500 - 999 Students

Table 3 presents enrollment dat and attrition rates for school districts operating high schools with a total enrollment of from 500 - 999 students. As a review of the data in Table 3 shows, attrition rates ranged from a low of 7 percent for Yoakum ISD to a high of 61 percent for Roma ISD.

[a] Enrollment data is from the Fall Membership Survey and was obtained from the Texas Education Agency.

[b] Based on IDRA's attrition formula.

1,000 - 2,499 Students

Table 4 presents enrollment data and attrition rates for school districts operating high schools with an enrollment of from 1,000 to 2,499 students. Attrition rates for the 91 districts ranged from a low of 1 percent for Port Neches ISD to a high of 50 percent for Donna ISD.

2,500 - 4,000 Students

Enrollment data and attrition rates are presented for school districts with high schools having a student enrollment of from 2,500 to 4,999 students in Table 5. Attrition rates ranged from a low of 1 percent for Port Arthur ISD to a high of 53 percent for South San Antonio ISD.

5,000 - 9,999 Students

Table 6 presents enrollment data and attrition rates for school districts having high schools with enrollment of from 5,000 - 9,999 students. Attrition rates ranged from a low of 16 percent for Hurst-Euless-Bedord ISD to a high of 49 percent for both Brownsville ISD and Laredo ISD.

10,000 Students and Over

Table 7 presents enrollment data and attrition rates for school districts having a high school enrollment of 10,000 studetns and over. Attrition rates ranged from a low of 25 percent for Richardson ISD to a high of 47 percent for San Antonio ISD.

All District Sizes

Table 8 presents enrollment data and attrition rates by size of district. As a review of Table 8 indicates, attrition rates for the most part appeared to be affected by district size. The larger the school district, the alrger the reported attrition rate. The lone exception is that the attrition rate decreased from schools with 500 - 999 students (33%) to schools with 1,000 - 2,499 students (31%). Attrition rates ranged from a low of 25 percent for districts having less than 100 students to a high of 37 percent for districts having 10,000 or more students.

TABLE 8

ENROLLMENT DATA AND ATTRITION RATES BY DISTRICT SIZE: TEXAS, 1982-83 TO 1985-86

District Size (number of districts)*	9th Grade Enrollment 1982-83	12th Grade Enrollment 1985-86	High School (9th-12th Grade) Enrollment 1982-83	High School (9th-12th Grade) Enrollment 1985-86	12th Grade Expected Enrollment 1985-86	Attrition (Number)	Attrition Rate (Percentage)
Less than 100 students (n = 225)	3,752	2,939	13,333	13,898	3,911	972	25
100 - 499 students (n = 467)	32,333	24,172	112,130	117,953	34,012	9,840	29
500 - 999 students (n = 117)	24,712	17,956	83,126	90,592	26,932	8,976	33
1,000 - 2,499 students (n = 91)	36,850	27,007	126,510	134,427	39,156	12,149	31
2,500 - 4,999 students (n = 34)	35,657	26,369	122,310	133,724	38,985	12,616	32
5,000 - 9,999 students (n = 20)	40,318	29,004	132,400	145,702	44,369	15,365	35

All District Sizes (n = 967)	243,119	172,287	818,042	868,263	257,999	85,712	33

*District size is based on the 9th-12th grade enrollment in the base year

COUNTY-LEVEL ANALYSIS

An analysis of enrollment data and attrition rates at the county level are presented in this section of the report. Two hundred fifty-two (252) of the State's 254 counties had public high schools within their boundaries. Similiar to the district-level analysis above, counties were divided into six (6) geographic regions for analysis. These regions include:

(1) Panhandle
(2) North
(3) West
(4) East
(5) Central
(6) South

Figure 2 presents the geographic boundaries for each region. It should be remembered that attrition estimates in this publication are most reliable at the regional and State levels.

Within this section, enrollment and attrition data are presented without regards for race, ethnicity, and sex. Please see Appendix B for complete enrollment and attrition data by county.

Panhandle

Table 9 presents enrollment data and attrition rates for school districts aggregated by county in the Panhandle geographical region. School districts in 44 counties comprised this region. As enrollment data in Table 9 indicates, the total enrollment in the high schools of the

---

[a] Enrollment data is from the Fall Membership Survey and was obtained from the Texas Education Agency.

[b] Based on IDRA's attrition formula.

44 counties increased slightly from 40,317 in the base year (1982-83) to 40,333 in the end year (1985-86). During this same three-year period, the size of the freshman class decreased from 11,238 during the base year to 8,357 during the end year.

A review of calculated attrition rates for the 44 counties comprising the Panhandle region indicates that attrition rates ranged from a low of 2 percent for Kent County to high of 58 percent for Collingsworth County. The attrition rate for the entire Panhandle region was 26 percent. The attrition rates of 24 counties fell below the regional average of 26 percent while attrition rates of the remaining 20 counties either matched or exceeded the regional average.

North

Table 10 presents enrollment data and attrition rates for school districts in counties comprising the North geographical region of Texas. School districts in 34 counties comprised this region. Enrollment data indicate that total enrollment in high schools in the 34 county districts increased by approximatley 9 percent over the three-year period, from 195,927 during the base year to 211,892 during the end year. During this same period, the size of the freshman class diminished from 56,935 during the base year to 41,718 during the end year.

[a] Enrollment data is from the Fall Membership Survey and was obtained from the Texas Education Agency.

[b] Based on IDRA's attrition formula.

As data on attrition rates in Table 10 shows, attrition rates ranged from a low of 12 percent in Clay County to a high of 48 percent in Shackelford County; the regional attrition rate was 32 percent. The attrition rates of high schools in 19 counties fell below the regional average while the attrition rates of 14 counties exceeded the regional average; and attrition rate was not calculated for one county.

West

Table 11 presents enrollment data and attrition rates for school districts in counties comprising the West geographical region. A total of 50 counties constituted the West region; 49 of the 50 counties had one or more districts having a high school. As a review of enrollment data in Table 11 indicates, total enrollment in the counties' school districts increased from 77,969 students during the base year to 81,878 students during the end year. The cohort of 9th Grade students decreased from 23,894 during the base year to 16,517 during the end year.

Attrition rates by county ranged from a low of 2 percent for Terrell County to a high of 50 percent for Reeves County. The regional attrition rate was 34 percent. Attrition rates for 28 of the 50 counties fell below the regional average while the attrition rates of 20 counties matched or exceeded the regional average. An attrition rate

[b] Based on IDRA's attrition formula.

was not calculated for one county while another county did not have a high school.

East

Table 12 presents enrollment data and attrition rates for school districts in counties comprising the East geographical region of Texas. A total of 61 counties comprised this geographical region. As enrollment figures in Table 12 shows, the total high school enrollment increased from 284,115 students in the base year to 295,632 students in the end year. The enrollment of freshman students decreased by approximately 30 percent from the base year to the end year; the number of students enrolled during the base year was 84,787 while the end year enrollment was 58,949.

As data on attrition rates in Table 12 shows, attrition rates ranged from a low of 12 percent for Colorado County to a high of 42 percent for Grimes County; the regional attrition rate was 33 percent. Forty-four (44) of the counties had attrition rates which fell below the regional average while the remaining 17 counties had attrition rates that either matched or exceeded the regional average.

Central

Enrollment data and attrition rates in school districts in counties comprising the Central geographical region of Texas are presented in Table 13. Twenty-five (25) counties

[b] Based on IDRA's attrition formula.

comprised the Central Texas Region. The total enrollment figures for high schools increased from 63,562 students in the base year to 71,127 students in the end year. For the cohort of 9th Grade students beginning 1982-83, enrollment figures decreased from 18,278 during the base year to 13,980 during the end year.

Attrition rates by county ranged from a low of 13 percent for Fayette County to a high of 44 percent for Llano County; the regional attrition rate was 32 percent. The attrition rates of 14 counties fell below the regional average while the attrition rates of 9 counties matched or exceeded the regional average; attrition rates were not computed for two counties.

South

Table 14 presents enrollment data and attrition rates for school districts in counties comprising the South geographical region of Texas. Forty (40) counties comprised this geographical region. As enrollment figures in Table 14 indicates, total enrollment figures for high schools in the counties increased from 156,152 in the base year to 167,401 in the end year. During this same three-year period, the enrollment of 9th Grade students in the base year to the end year decreased from 47,987 students to 32,766 students.

Attrition rates by county ranged from a low of 1 percent for Refugio County to a high of 48 percent for Webb County; the regional attrition rate was 36 percent.

[a] Enrollment data is from the Fall Membership Survey and was obtained from the Texas Education Agency.

[b] Based on IDRA's attrition formula.

Twenty-eight (28) counties had attrition rates which fell below the regional average while 11 counties had attrition rates that either matched or exceeded the regional average; one county (Kenedy) did not have high school within its boundaries.

All Regions

Table 15 presents enrollment data and attrition rates of aggregate county districts by geographical region of Texas. As a review of enrollment figures in Table 15 indicates, total enrollment in high schools increased from 818,042 during the base year to 868,263 during the end year. During this same three-year period, the enrollment for the freshman cohort of students decreased from 243,119 for the base year to 172,287 for the end year.

Attrition rates by geographical region ranged from a low of 26 percent for the Panhandle Region to a high of 36 percent for the South Texas Region. The overall attrition rate for all regions, or the State of Texas as a whole, was 33 percent.

TABLE 15

EDUCATION SERVICE CENTER ANALYSIS

In this section of the report, enrollment data and attrition rates are presented for each of the twenty Education Service Center (ESC) regions in Texas. ESC geographic boundaries and headquarters are presented in Figure 3. Enrollment data and attrition rates were analyzed in two ways: (1) ESC Region by site and (2) ESC Region aggregate for all sites. The results of the analysis is represented below.

Education Service Center Region By Site

Enrollment data and attrition rates are presented below for each ESC Region by site. The number of sites for each region varied. Each site was comprised of counties where school district data was aggregated by county.

Table 16 presents enrollment data and attrition rates for ESC-Region 1 by site. Total high school enrollment for the region increased from 45,208 students in the base year (1982 - 83) to 51,619 students in the end year (1985 - 86). During the same three-year period, the enrollment of the cohort of 9th Grade students declined from 15,251 to 9,891. Attrition rates by site ranged from a low of 33 percent for Jim Hogg County, the county with the smallest enrollment in the region, to a high of 48 percent for Webb County, the third most populous county in the region. The two most populous counties, Cameron and Hidalgo, had attrition rates of 46 percent and 42 percent, respectively. The overall attrition rate for all sites comprising the region was 43 percent.

[a] Enrollment data is from the Fall Membership Survey and was obtained from the Texas Education Agency.

[b] Based on IDRA's attrition formula.

Enrollment data and attrition rates for ESC Region 2 by site are presented in Table 17. High school enrollment for the region increased slightly from the base year to the end year. The enrollment of the 9th Grade cohort of students for this same period declined from 7,893 students to 5,708. Attrition rates by site ranged from a low of 17 percent for Duval County to a high of 43 percent for Aransas County. The most populous site, Nueces County, had an attrition rate of 26 percent while the least populous site, McMullen County, had an attrition rate of 23 percent. The overall attrition rate for ESC Region 2 was 29 percent.

Table 18 presents enrollment data and attrition rates by site for ESC Region 3. As a review of the enrollment figures in the table shows, both total high school enrollment and enrollment for the freshmen cohort of students declined from the base year of the longitudinal study to the end year. Attrition rates by site ranged from a low of 1 percent for Refugio County to a high of 28 percent for both Jackson and Matagorda counties. The overall attrition rate for the region was 23 percent.

Enrollment data and attrition rates by site are presented for ESC Region 4 in Table 19. Total high school enrollment increased from 168,587 students during the base year to 176,898 students during the end year; enrollment for the 9th Grade cohort of students declined from 52,203 to 34,461 during the same three-year period. Attrition rates by site ranged from a low of 30 percent for Galveston County to a high of 40 percent for Fort Bend County. The most populous site, Harris County had an attrition rate of 38 percent. The overall attrition rate for ESC

[a] Enrollment data is from the Fall Membership Survey and was obtained from the Texas Education Agency.

[b] Based on IDRA's attrition formula.

Region 4 was 37 percent.

Table 20 presents enrollment data and attrition rates by site for ESC Region 5. As a review of enrollment figures in Table 20 indicates, total high school enrollment declined from 26,836 students in the base year to 26,038 studetns in the end year; enrollment fort the 9th Grade cohort of students also declined (from 7,285 students to 5,597 studetns) during this same period. Attrition rates by site ranged from a low of 17 percent for Jefferson County to a high of 30 percent for Jasper County. Jefferson County, the most populous in the region, experienced a decline in enrollment for both the high school population and the population of the cohort group. The overall attrition rate for the region was 21 percent.

Enrollment data and attrition rates by site are presented in Table 21 for ESC Region 6. Total high school enrollment increased from 27,026 during the base year to 28, 372 during the end year; enrollment for the cohort of 9th Grade students over the same time period declined from 8,104 students to 5,651 students. Attrition rates by site ranged from a low of 20 percent for Milam County to a high of 42 percent for Grimes County. The attrition rate for all sites as an aggregate was 34 percent.

Table 22 presents enrollment data and attrition rates by site for ESC Region 7. As a review of enrollment figures in the table shows, total high school enrollment increased from 39,876 students during the base year to 42,187 students during the end year. Enrollment for the freshmen cohort of students declined

from 11,269 to 8,724 during the three-year period. Attrition rates by site ranged from a low of 20 percent for Upshur County to a high of 40 percent for Rains County. The overall attrition rate for ESC Region 7 was 27 percent.

Enrollment data and attrition rates by site for the ESC Region 8 are presented in Table 23. Total high school enrollment within the region increased from 14,687 students in the base year to 14,830 students in the end year; enrollment for the 9th Grade cohort of students declined from 3,970 students to 3,035 students during the same three-year period. Attrition rates by site ranged from a low of 13 percent for Bowie County of a high of 39 percent for Hopkins County. The overall attrition rate for the region was 24 percent.

Table 24 presents enrollment data and attriton rates by site for ESC Region 9. As a review of enrollment figures indicates, total high school enrollment increased slightly from the base year to the end year; enrollment for the 9th Grade Cohort of students declined from 3,058 students to 2,321 students during the three-year period. Attrition rates by site ranged from a low of 12 percent for Clay County to a high of 38 percent for Young County; the overall attrition rate for the region was 26 percent.

Table 25 presents enrollment data and attrition rates by site for ESC Region 10. Total enrollment within the region increased from 111,883 students during the hase year to 119,395 students during the end year. Enrollment for the freshman cohort of students over thre three-year period declined from 33,285 students to 23,306 students. Attrition rates by site ranged from

a low of 15 percent for Fannin County to a high of 40 percent for Kaufman County. The overall attrition rate for the region was 34 percent.

Enrollment data and attrition rates by site are presented for ESC Region 11 in Table 26. As a review of enrollment figures shows, total enrollment within the region increased from 69,968 students during the base year to 78,058 students during the end year. Enrollment for the 9th Grade cohort of students declined from 19,737 students to 15,468 during the same time period. Attrition rates by site ranged from a low of 19 percent for Hood County to a high of 35 percent for Johnson County. The overall attrition rate for the region was 30 percent.

Table 27 presents enrollment data and attrition rates by site for ESC Region 12. Total high school enrollments increased from 26,443 students over the three-year period. Attrition rates ranged from a low of 20 percent for Falls County to a high of 39 percent for Mills County. The attrition rate for all sites as an aggregate was 26 percent.

Table 28 presents enrollment data and attrition rates by site for ESC Region 13. As a review of enrollment figures in Table 28 indicates, total high school enrollment increased from 43,381 students to 49,662 students over the three-year longitudinal period; enrollment for the freshmen cohort of students decreased from 12,967 students to 9,697 students from the base year to the end year. Attrition rates by site ranged from a low of 13 percent for Fayette County to a high of 44 percent for Llano County. The overall attrition rate for the

region was 35 percent.

Enrollment data and attrition rates by site are presented for ESC Region 14 in Table 29. Total high school enrollment for the region increased from 12,580 students during the base year to 12,921 students during the end year. During the same time period, enrollment for the 9th Grade cohort of students declined from 3,621 students to 2,674 students. Attrition rates by site ranged from a low of 15 percent for Comanche County to a high of 48 percent for Shackelford County. The attrition rate for the region was 28 percent.

Table 30 presents enrollment data and attrition rates by site for ESC Region 15. Total high school enrollment increased slightly from 13,146 students during the base year to 13,460 students during the end year. Enrollment for the freshmen cohort of students over the three-year time period declined from 4,033 students to 2,798 students. Attrition rates by site ranged from a low of 11 percent for Coke County and for Mason County to a high of 49 percent for Val Verde County. The overall attrition rate for the region was 32 percent.

Enrollment data and attrition rate by site are presented for ESC Region 16 in Table 31. As enrollment figures in Table 31 show, total high school enrollment increased from 20,155 students during the base year to 20,704 students during the end year; enrollment for the 9th Grade cohort of students declined from 5,590 students to 4,323 students. Attrition rates by site ranged from a low of 9 percent for Oldham County to a high of 58 percent for Collingsworth County. The overall attrition rate for the region was 25 percent.

[a] Enrollment data is from the Fall Membership Survey and was obtained from the Texas Education Agency.

[b] Based on IDRA's attrition formula.

Table 32 presents enrollment data and attrition rates by site for ESC Region 17. As a review of enrollment figures in Table 32 indicates, total high school enrollment and enrollment of the 9th Grade cohort of students declined from the base year to the end year. Attrition rates by site ranged from a low of 6 percent for Cottle County to a high of 41 percent for Terry County. The overall attrition rate for the region was 27 percent.

Enrollment data and attrition rates by site are presented for ESC Region 18 in Table 33. As a review of enrollment figures in Table 33 shows, total high school enrollment increased from 19,691 students to 20,134 students over the three-year longitudinal period; enrollment for the freshmen cohort of students declined from 5,784 students to 3,956 students over the same time period. Attrition rates by site ranged from a low of 2 percent for Terrell County to a high of 50 percent for Reeves County. The overall attrition rate for the region was 33 percent.

Table 34 presents enrollment data and attrition rate for ESC Region 19. Total high school enrollment increased from 32,147 students during the base year to 35,105 students during the end year; enrollment for the 9th Grade cohort of students declined from 10,330 students to 7,024 students during the same time period. Attrition rates by site ranged from a low of 38 percent for El Paso County to a high of 40 percent for Hudspeth County; the overall attrition rate for the region was 38 percent.

Enrollment data and attrition rates by site are presented for ESC Region 20 in Table 35. As a review of enrollment figures

---

[a] Enrollment data is from the Fall Membership Survey and was obtained from the Texas Education Agency.

[b] Based on IDRA's attrition formula.

in Table 35 indicates, total high school enrollment increased from 69,373 students during the base year to 74,209 students during the end year. Enrollment for the 9th Grade cohort of students over the same time period declined from 21,174 students to 14,451 students. Attrition rates by site ranged from a low of 22 percent for Dimmit County to a high of 45 percent for Kinney County. The most populous site, Bexar County had an attrition rate of 37 percent. The overall attrition rate for ESC region 20 was 36 percent.

All ESC Regions

Within this section of the report, enrollment data and attrition rates are presented for each of the twenty ESC regions of Texas. Table 36 presents enrollment data and attrition rates by ESC Region. Attrition rates among the ESC regions ranged from a low of 21 percent in ESC Region 5 to a high of 43 percent in ESC Region 1. The attrition rate for all ESC Regions combined was 33 percent. Attrition rates in twelve ESC Regions (Regions 2, 3, 5, 7, 8, 9, 11, 12, 14, 15, 16, and 17) fell below the total ESC average. The attrition rate of one ESC Region (Region 18) matched or equaled the total ESC average. The attrition rates in the seven remaining ESC Regions (Region 1, 4, 6, 10, 13, 19 and 20) exceeded the total ESC average.

JTPA SERVICE DELIVERY AREA ANALYSIS

In this section of the report, enrollment data and attrition rates are presented for the Service Delivery Areas (SDAs) established in the State of Texas for the Job Training Partnership Act (JTPA). The 34 SDAs and the counties and/or localities comprising each are displayed in Figure 4. Enrollment data and attrition rates were analyzed in two ways: (1) SDA by site and (2) SDA aggregate for all sites. The results of the analysis are presented below.

Service Delivery Areas By Site

Within this section of the report, enrollment and attrition rates are presented for each SDA by site. The number of sites per SDA varied; some SDAs were comprised of a number of sites while some SDAs were comprised of one or two sites. In most cases an SDA was comprised of counties within the State; in a few instances an SDA was comprised of one or more localities. Where an SDA was comprised of a number of counties; data was aggregate for all districts within the county. Where an SDA was comprised of a one or more localities, data was presented for one or more school districts within a county.

Table 37 presents enrollment data and attrition rates for the Panhandle SDA by site. Total high school enrollment increased from 19,876 during the base year (1982-83) to 20,422 during the end year (1985-86); the enrollment of the 9th Grade cohort of students decreased from 5,499 to 4,267 during this same three year period. Attrition rates ranged from a low of 9 percent for Oldham County to a high of 58 percent for Collingsworth County. The overall attrition rate for the Panhandle SDA was 24 percent.

Enrollment data and attrition rates are presented for the North Texas SDA by site in Table 38. As a review of enrollment data in the table indicates, total enrollment increased slightly from 11,116 during the based year to 11,348 during the end year; enrollment for the freshmen cohort of students decreased from 3,032 to 2,283 during this same period. Attrition rates within the SDA ranged from a low of 6 percent for Cottle County to a high of 39 percent for ChildreSs County. The overall attrition rate for the North Texas SDA was 26 percent.

Table 39 presents enrollment data and attrition rates for the North East SDA by site. As a review of enrollment data in Table 39 indicates, total enrollment for grades 9th - 12th increased from the base year to the end year while enrollment for the cohort of 9th Grade students decreased over this same three-year period. Attrition rates by site ranged from a low of 13 percent for Bowie County to a high of 39 percent for Hopkins County. The overall attrition rate for the North East SDA was 24 percent.

Table 40 presents enrollment data and attrition rates for the East Texas SDA by site. Total enrollment increased from 32,537 students during the base year to 34,577 students during the end year. Enrollment for the cohort of 9th grade students decreased over the three-year period from 9,177 to 7,162. Attrition rates by site ranged from a low of 20 percent for Upshur County to a high of 40 percent for Rains County. The overall attrition rate for the East Texas SDA was 27 percent.

Enrollment data and attrition rates are presented for the West Central SDA by site in Table 41. Total enrollment increased from 16,072 students during the base year to

16,358 during the end year; enrollment for the cohort of 9th Grade students decreased from 4,665 to 3,416 during the same period. Attrition rates by site ranged from a low of 2 percent for Kent County to a high of 48 percent for Shackelford County. The overall attrition rate for this SDA was 28 percent.

Table 42 presents enrollment data and attrition rates by site for the Upper Rio Grande SDA. As enrollment figures in this table show, total enrollment increased from 33,256 to 36,158 from the base year to the end year; enrollment for the freshmen cohort of students decreased from 10,671 to 7,256 during this same three-year period. Attrition rates by site ranged from a low of 9 percent for Culberson County to a high of 40 percent in both Hudspeth and Presidio counties. The attrition rate for the sites in aggregate was 37 percent.

Enrollment data and attrition rates by site are presented for the South East SDA in Table 43. As a review of the enrollment figures in Table 43 indicates, both total enrollment and the enrollment of the 9th Grade Cohort of students decreased from the base year to the end year.

[b] Based on IDRA's attrition formula.

*City of San Antonio is included in the Bexar County total high of 37 percent for both Bexar and Kerr counties. The overall attrition rate for the Alamo SDA was 35 percent.

Enrollment data and attrition rates by site are presented for the Texoma SDA in Table 46. As a review of enrollment data in Table 46 indicates, total enrollment increased from 7,364 during the base year to 7,645 during the end year; enrollment for the cohort of 9th Grade students decreased over the three-year period from 2,060 to 1,578. Attrition rates by site ranged from a low of 15 percent for Fannin County to a high of 29 percent for Grayson County. The overall attrition rate was 26 percent for the Texoma SDA.

Table 47 presents enrollment data and attrition rates by site for the Central Texas SDA. Total enrollment increased from 13,030 students during the base year to 14,030 students during the end year. Enrollment for the cohort of 9th Grade students decreased from 3,451 students to 2,787 during this same three-year period. The overall attrition rate was 25 percent.

Table 48 presents enrollment and attrition data by site for the Middle Rio Grande SDA. As a review of enrollment figures in Table 48 indicates, total enrollment increased from 9,066 during the base year to 9,696 during the end year. During this same three-year period, enrollment for the 9th Grade cohort of students decreased from 3,026 to 1,959. Attrition rates by site ranged from a low of 22 percent for Dimmitt County to a high of 49 percent for Val Verde County. The overall attrition rate for this SDA was 39 percent.

Enrollment data and attrition rates for the City of Dallas SDA are presented in Table 49 by site. High schools within the Dallas ISD comprised the City of Dallas SDA. Both total enrollment and the enrollment of the 9th Grade cohort of students declined from the base year to the end year. The calculated attrition rate for the City of Dallas SDA was 43 percent.

Table 50 presents enrollment data and attrition rates for the Balance of Dallas County SDA by site. Excluding Dallas ISD, this SDA was comprised of high schools from school districts within Dallas County. Total enrollment

[a] Enrollment data is from the Fall Membership Survey and was obtained from the Texas Education Agency.

[b] Based on IDRA's attrition formula.

Enrollment data and attrition rates by site are presented for the Balance of Gulf Coast Planning Region in Table 57. Total high school enrollment increased from 59,275 during the base year to 63,204 during the end year. Enrollment for the 9th Grade cohort of students decreased from 17,782 to 12,519 during the same three-year period. Attrition rates by site ranged from a low of 12 percent for Colorado County to a high of 40 percent for Fort Bend County. The overall attrition rate was 34 percent.

Table 58 presents enrollment data and attrition rates for the City of Corpus Christi and Nueces County SDA. This SDA was comprised of high schools in school districts within Nueces County, including Corpus Christi ISD. Total high school enrollment increased from 15,561 students during the base year to 16,119 students during the end year. Enrollment for the cohort of 9th Grade students decreased over the same three-year period from 4,125 to 3,161. The attrition rate for the SDA was 26 percent.

Enrollment data and attrition rates by site are presented for the Balance of Coastal Bend Planning Region in Table 59. As a review of enrollment figures in this table

percent for Hidalgo County. The overall attrition rate for this SDA was 40 percent.

Enrollment data and attrition rates are presented for the Concho Valley SDA by site in Table 62. As a review of enrollment data in the table indicates, total enrollment increased slightly from 7,172 during the based year to 7,262 during the end year; enrollment for the freshmen cohort of students decreased from 2,111 to 1,578 during this same period. Attrition rates within the SDA ranged from a low of 11 percent for Coke County to a high of 41 percent for both Kimble and Menard Counties. The overall attrition rate for the Concho Valley SDA was 26 percent.

Table 63 presents enrollment data and attrition rates for the Permain Basin SDA by site. As a review of enrollment data in Table 63 indicates, total enrollment for grades 9th-12th increased from the base year to the end year while enrollment for the cohort of 9th Grade students decreased over this same three-year period. Attrition rates by site ranged from a low of 7 percent for Glasscock County to a high of 50 percent for Reeves County. The overall attrition rate for the Permian Basin SDA was 33 percent.

County. The overall attrition rate for the Balance of the South Plains Planning Region was 29 percent.

All Service Delivery Areas

Table 71 presents enrollment data and attrition rates for each of the 34 JTPA service delivery areas. As a review of the information shows, attrition rates ranged from a low of 20 percent for the South East service delivery area to a high of 47 percent for the South Texas Planning Region. The attrition rate for all service delivery areas combined was 33 percent. Six of the service delivery areas (Panhandle, North East, South East, Golden Crescent, Central Texas, and Lubbock and Garza counties) had attrition rates of 25 percent or less. Fourteen service delivery areas (North Texas, East Texas, West Central, Texoma, Fort Worth Consortium, Balance of Tarrant County, Balance of Capital Planning Region, City of Corpus Christi and Nueces County, Balance of Coastal Bend Planning Region, Concho Valley, Deep East Texas, Balance of North Central Planning Region, Heart of Texas and Balance of South Plains Planning Region) had attrition rates of 26 to 30 percent. Five service delivery areas (Alamo, Balance of Dallas County, Balance of Gulf

STATEWIDE ANALYSIS

Within this section of the report enrollment data and an attrition rate is presented for the state of Texas as a whole. This data is analyzed on the basis of race-ethnicity and sex.

Analysis By Race-Ethnicity

Table 72 presents enrollment data and attrition rates by race-ethnicity group. As a review of enrollment figures in Table 72 shows, total high school enrollment was 818,042 students for the base year and 868,263 students for the end year; the 9th Grade cohort group total was 243,119 students during the base year. Of total high school enrollment during the base year, the American Indian/Alaskan Native group constituted about 1,345 (or 0.2 percent) of the total; the Asian/Pacific Islander group constituted about 10,824 (or 1.3 percent) of the total; the Hispanic group constituted about 198,677 (or 24.3 percent) of the total; the Black non-Hispanic group constituted about 124,493 (or 15.2 percent) of the total; and the White non-Hispanic group constituted about 482,702 (or 59.0 percent) of the total. From the base year to the end year, total enrollment for

AVAILABLE

Asian/Pacific Islanders, Hispanics and White non-Hispanics increased while the enrollment figures for American Indian/Alaskan Natives and Blacks decreased slightly.

As a review of Table 72 shows the attrition rates by race-ethnicity groups ranged from a row of 27 percent for White non-Hispanics to a high of 45 percent for American Indian/Alaskan Natives and Hispanics; the attrition rates for Asian/Pacific Islanders and Black non-Hispanics was 33 percent and 34 percent, respectively. Of the approximately, 86,000 students lost to attrition during the longitudinal cohort study, 185 (or 0.2 percent) were American Indian/Alaskan Natives; 1,523 (or 1.8 percent) were Asian/Pacific Islanders; 33,589 (or 38.9 percent) were Hispanics; 12,273 (or 14.2 percent) were Black non-Hispanics; and 38,721 (or 44.9 percent) were White non-Hispanics.

Analysis By Sex

In this section of the report, enrollment data and attrition rates by sex or gender will be presented. Table 72 presents enrollment data and attrition rates for males and females in the State's high schools. As a review of enrollment figures in Table 72 shows, total high school enrollment was 818,042 students for the base year of 1982-83 with 243,119 of these students comprising the 9th Grade cohort group. Of the total high school enrollment during the base year, males constituted about 51 percent of the total while females constituted about 49 percent of the total; males constituted about 54 percent of the 9th Grade cohort group during the base year while females constituted about 46 percent of this group. Total high school enrollment for the end year (1985-86) was 868,263 students, an increase of about 50,221 students or about 6.14 percent. Enrollment for the cohort group during the end year (see 12th Grade enrollment for 1985-86) was 172,287 students. During the end year, males constituted about 51 percent of total high school enrollment while females constituted about 49 percent; males constituted about 50 percent of the cohort group enrollment for the end year while females also constituted about 50 percent of the enrollment.

A further review of data in Table 72 indicates that the calculated attrition rate for males was 35 percent as compared to 32 percent for females. The attrition rate for both sexes combined was 33 percent. Approximately, 86,000 students were lost to attrition from the base year of the longitudinal cohort study to the end year. Of the approximately 86,000 students lost to attrition, 46,325 (or 54 percent were males and 39,420 (or 46 percent) were females.

Analysis By Race-Ethnicity and Sex

Table 72 presents enrollment data and attrition rate by race-ethnicity and sex for the State of Texas. As a review of the information in this table shows, calculated attrition rates ranged from a low of 26 percent for White females to a high of 51 percent for American Indian/Alaskan Native males; the overall attrition rate for race-ethnicity and sex groups in aggregate was 33 percent. Among the three major racial/ethnic groups in the State, attrition rates differed greatly - 27 percent for Whites, 34 percent for Blacks and 45 percent for Hispanics.

With regards to sex or gender, the attrition rate for males was 35 percent compared to 32 percent for females. Within each racial/ethnic group, the attrition rate for males exceeded that of their female counterparts. Of the approximately 86,000 students lost to attrition, about 39,673 (or 46 percent) were females and about 46,603 (or 54 percent) were males. Among males, the attrition rates ranged from a low of 28 percent for White males to a high of 51 percent for American Indian/Alaskan Native males. Among females, the attrition rates ranged from a low of 26 percent for White females to a high of 43 percent for Hispanic females.
